RINCON
CHANGE THE RULES

THE BEST CHOICE

Communication Service Providers (CSPs) are increasingly turning to private label optics in their network builds. By choosing Rincon's private label optics carriers can significantly **reduce their spending** on transceivers as well as accelerate their network builds due to the **elimination of lead times**.

Rincon Technology manufactured optics are compatible with all of the leading OEM platforms, backed by a lifetime warranty, and offer dramatic costs saving—often 80-90% off list price. Using Rincon Technology optics helps you meet your budget and logistics requirements.

Our full selection of optics include SFP, SFP+, QSFP+, CFP, X2, XENPAK, XFP, GBIC and QSFP form factors. All of our optics are fully tested and verified with the latest software releases.
