

RINCON

CHANGE THE RULES

Pioneers in the Circular Economy

In 2003 Rincon's founders launched the company with the mission to help reduce the cost, time, and environmental impact of building telecommunication networks.

Sustainability has always been at the core of what we do and the foundation of our business model and operations.

ECO

A CIRCULAR ECONOMY IS IN OUR DNA

Many of our Communication Service Provider customers throughout the world have launched robust sustainability initiatives of their own and we've supported these efforts via our Investment Recovery Services, with particular emphasis and success in Upcycling.

We are the number one long term viable hardware solution for carriers that will be supporting legacy networks that utilize Cisco NCS & ASRs, Ciena OME6500, Nokia 1830 PSS, Juniper MX/EX, Dell and HP among others on hand and ready to ship immediately.
